01 / THE PROBLEM

THE WAR YOU CAN'T SEE — BUT YOU'RE LOSING EVERY DAY

Short sellers operate with weapons your board cannot detect. 45-day delayed filings. Hidden rehypothecation. Synthetic positions. By the time you see the damage, billions in shareholder value have vanished.

\$4T+

VALUE DESTROYED BY SHORTS

Trillions in market cap erased by coordinated short attacks across US-listed companies.

70%

UTILIZATION THRESHOLD

When utilization exceeds 70%, short squeezes become increasingly probable.

45

DAYS BLIND DELAY

13F filings arrive 45 days late. By then, short sellers have already repositioned.

0%

VISIBILITY INTO LENDING

Public companies have zero real-time visibility into how their shares are being lent.

02 / THE ARSENAL

FIVE INTEGRATED WEAPONS. ONE MISSION: DEFEND YOUR VALUATION.

The world's first Equity Defense Infrastructure — five integrated weapons that work alone or together.

01 INTELLIGENCE

Real-time short monitoring, DTC participant data, borrowed-share analytics, utilization heat maps, synthetic position detection.

02 TOKENIZATION

Convert shares to ERC-1400 tokens. Remove from lending pools. Enable 24/7 trading and instant settlement.

CURRENC LENDING

Shareholders pledge tokenized shares as collateral to borrow stablecoins without dilution or margin calls.

04

DEX LISTING

+

24/7 global trading on Jupiter with institutional-grade liquidity.

05

IR & MARKET MAKING

+

Strategic IR and continuous market making with tight spreads and deep liquidity.

CURRENC • CAPITAL
01

NASDAQ-LISTED

We deployed this on ourselves first. CURRENC (NASDAQ: CURR) is the first public company to run its own Equity Defense Infrastructure.

02

OPERATIONAL PROOF

CURR has already tokenized its own shares — filed with the SEC, live on Ethereum, Solana, and Avalanche. This is not a concept. This is proof.
