Section 1 (HERO Section)

Style: In this section, I want a stock price tanking image (red and danger feel like the image attached)

Slogan: YOUR SHARES ARE UNDER ATTACK. WE HELP YOU FIGHT BACK.

Content: The Equity Defense Infrastructure for Public Companies

Five integrated weapons to defend your valuation, secure your shares, and unlock 24/7 global liquidity.

Section 2:

Content: EQUITY DEFENSE FRAMEWORK

01

THE PROBLEM

Short sellers are destroying valuations with hidden weapons

02

THE SOLUTION

Five integrated weapons to fight back

03

PRICING & NEXT STEPS

Deploy in 4 weeks. No cash outlay option available.

Section 3:

THE PROBLEM

Short sellers are destroying public company valuations
with weapons most boards never see.

THE SHORT ATTACK EPIDEMIC

1,000+

US public companies under
active short attack

>70%

Average utilization rate
on attacked stocks

\$4T+

Annual shareholder value
destroyed by shorts

THE REALITY

* Short interest >30% with utilization above 70% — shares are being borrowed and re-lent multiple times.

* Price decline of 30–70% below fair value — not based on fundamentals, but on engineered selling pressure.

* 18-month average attack duration — most boards don't recognize the attack until months of damage are done.

* 5 hidden weapons — delayed disclosure, rehypothecation, synthetic shorts, dark pools, FUD campaigns.

Section 4

THE 5 HIDDEN WEAPONS OF SHORT SELLERS

DELAYED DISCLOSURE

45-day delay before short positions must be reported. By then, damage is done.

02

REHYPOTHECATION

Single share lent 3–5x through DTC omnibus accounts. One share creates multiple short positions.

03

SYNTHETIC SHORT POSITIONS

Options market makers create synthetic shorts through put-call parity. Invisible to short interest reports.

04

DARK POOL MANIPULATION

Off-exchange trading hides true volume. Shorts use dark pools to avoid detection and manipulate price.

05

FUD CAMPAIGNS

Coordinated negative media, social media attacks, and analyst reports timed with short positions.

Section 5:

THE COST OF INACTION

SCENARIO — \$500M MARKET CAP COMPANY

-40%

Stock price decline

\$200M

Value destroyed

18 mo

Average attack duration

\$2M+

Direct defensive costs

HIDDEN COSTS

→ Management distraction (30% of CEO/CFO time)

→ Talent flight — key employees leave as stock declines

→ Acquisition vulnerability at distressed prices

→ Customer/partner confidence erosion

→ Increased cost of capital for future raises

→ Litigation costs from shareholder lawsuits

The real cost isn't the stock price decline.

It's the 18 months of management distraction, the talent that leaves, the acquisition that never happens, and the permanent damage to your company's reputation.

Most boards don't see the attack until it's too late.

Section 6:

THE SOLUTION

The world's first Equity Defense Infrastructure

— five integrated weapons to fight back.

THE FIVE-WEAPON ARSENAL

01

INTELLIGENCE

SaaS Platform

Real-time short monitoring.

DTC Participant data, borrowed-share analytics, utilization heat maps, synthetic position detection.

02

TOKENIZATION

TaaS — Securitize (SECZ)

Convert shares to ERC-1400 tokens.

Remove from lending pools.

Enable 24/7 trading, programmable shares, instant settlement.

03

LENDING

DeFi Protocols

Shareholders pledge tokenized shares as collateral to borrow stablecoins.

No dilution, no personal guarantee, no margin calls.

04

DEX LISTING

Jupiter via Jump

24/7 global trading on Jupiter.

Jump PropAMM provides institutional-grade liquidity.

\$64B/month DEX volume.

05

IR & MARKET MAKING

DLK + Jump

Strategic IR with tokenization expertise.

Continuous market making with tight spreads and deep liquidity.

For these 5 arsenal , please use format like in this attached image:

01
THE FIVE-WEAPON ARSENAL
Five integrated capabilities. No competitor offers all five.

01
SaaS MONITORING

Real-time short interest, borrow rates, institutional flows, squeeze alerts

Impact: See attacks before they hit

02
TaaS TOKENIZATION

SEC-compliant tokenization on Ethereum, Solana, Avalanche

Impact: Remove shares from lending pool

03
DeFi LENDING

Collateralized borrowing via Aave, Kamino, Morpho without selling

Impact: Unlock liquidity without dilution

04
DEX & CEX LISTING

24/7 global trading on Raydium, Orca, Jupiter + regulated CEXs

Impact: \$2T+ crypto investor base

05
IR & MARKET MAKING

Board-ready reports, crypto-native IR, tight spreads, volatility mgmt

Impact: Sustainable orderly markets

CURENC CAPITAL | The ONLY platform that does BOTH — Monitoring + Tokenization

Section 7:

01

WEAPON 1 — INTELLIGENCE (SaaS)

Real-time short monitoring platform — the only system that sees attacks before they destroy value

KEY CAPABILITIES

- ▶ DTC Participant borrowing data
- ▶ Borrowed-share analytics
- ▶ Utilization rate heat maps
- ▶ Synthetic position detection
- ▶ Early warning alerts (15–30 days)
- ▶ Cost-to-borrow tracking
- ▶ Dark pool monitoring
- ▶ FUD campaign detection
- ▶ Peer benchmarking

- ▶ Board-ready monthly reports

Bundled with Tokenization

4-week deploy

SECTION 8:

02

WEAPON 2 — TOKENIZATION (TaaS)

PARTNER — SECURITIZE

Convert your shares to ERC-1400 security tokens — remove them from global lending pools, enable 24/7 trading

KEY BENEFITS

- ▶ Remove shares from lending pools
- ▶ Real-time ownership visibility
- ▶ Programmable compliance (auto-enforced)
- ▶ Instant settlement (T+0)
- ▶ 24/7 global trading access
- ▶ Reduced transfer agent costs
- ▶ New DeFi-native investor base
- ▶ SEC-compliant via Securitize

SECURITIZE

First FINRA-approved broker-dealer for tokenized securities

ATS registered

\$1B+ tokenized

SECTION 9:

03

WEAPON 3 — LENDING PROTOCOLS

MORPHO / EULER

Shareholders pledge tokenized shares as collateral — no dilution, no personal guarantee, no margin calls

HOW IT WORKS

Step 1: Shares tokenized via Securitize (ERC-1400)

↓

Step 2: Shareholder connects wallets to lending protocols

↓

Step 3: Deposit tokenized shares as collateral

↓

Step 4: Borrow up to 50–70% LTV in USDC

↓

Step 5: Use USDC for any purpose

↓

Step 6: Repay anytime to reclaim shares

Key Terms

LTV: 30–40%

Interest: 4–12% APR

No hypothecation

SECTION 10:

04

WEAPON 4 — DEX LISTING

SECZ + JUMP + JUPITER

List your tokenized shares on Jupiter — Solana's #1 DEX aggregator with \$64B/month in volume

\$64B/mo

Jupiter swap volume

86.4%

Solana aggregator share

500K+

Active traders

KEY BENEFITS

- Jump PropAMM — proprietary AMM with institutional-grade pricing, 100ms updates
- 24/7/365 trading — not limited to 9:30am–4pm ET
- Global access — DeFi-native investors who never open a TradFi brokerage
- T+0 settlement — instant, not T+1

SECTION 11:

05

WEAPON 5 — IR & MARKET MAKING

DLK + JUMP

INVESTOR RELATIONS

Partner — DLK

- Tokenization-aware messaging strategy
 - Investor targeting (DeFi + TradFi)
 - Roadshow and conference management
 - Board education on tokenized equity
 - Crisis communications
-

MARKET MAKING

Partner — Jump Trading

- PropAMM operation on Jupiter (BisonFi)
- 24/7 continuous quote updates
- Deep liquidity at best bid/ask

► Cross-market arbitrage (NASDAQ ↔ DEX)

Commercial Terms

SECTION 12:

THE COMPLETE VALUE CHAIN

INTEGRATED EQUITY DEFENSE FLOW

1. INTELLIGENCE

Identifies short attack threats in real-time

↓

2. TOKENIZATION

Secures shares on blockchain via Securitize

↓

3. LENDING

Unlocks liquidity without dilution

↓

4. DEX LISTING

Expands to 24/7 global market access

↓

5. IR & MM

Defends and grows valuation

EACH WEAPON STANDS ALONE

Every weapon can be deployed independently.

Start with Intelligence + Tokenization (Step 1),

then add Lending (Step 2),

then DEX Listing (Step 3),

and finally IR & Market Making (Step 4).

Combined, the Five-Weapon Arsenal creates a comprehensive defense system that no public company has ever had before.

SECTION 13

DEPLOYMENT

STEP-BY-STEP

Step	Service	Fee	Timeline	Prerequisite
Step 1	Intelligence (SaaS) + Tokenization (TaaS)	\$350K cash or \$500K shares	4 weeks	None
Step 2	Lending Protocols (Morpho / Euler)	\$50K or 3% of facility	2–3 weeks	Step 1
Step 3	DEX Listing (Jupiter via Jump)	\$50K–100K	3–4 weeks	Step 1
Step 4	IR & Market Making (DLK + Jump)	Monthly retainer	Ongoing	Step 1 + 3

Key Notes

* No cash outlay option available — pay in shares at current market price.

* Each step can be taken independently.

(Remove Fee from the table above, we will hide the fee section in the website)

SECTION 14

WHY CURRENC CAPITAL

NASDAQ-LISTED

We've done this for ourselves.

NASDAQ: CURR.

First public company to deploy our own Equity Defense Infrastructure.

ONLY 5-WEAPON PLATFORM

No other platform combines

- * Intelligence
- * Tokenization
- * Lending
- * DEX
- * IR & Market Making

into one integrated system.

INSTITUTIONAL PARTNERS

Securitize

Jump Trading

DLK

Morpho

Euler

The best in class in each vertical.

NO CASH OUTLAY

Pay in shares at current market price.

Preserve cash for operations and growth.

4-WEEK DEPLOYMENT

From signed engagement to go-live in 4 weeks.

Fastest deployment in the industry.
